Personal Profile

Experienced Fraud Analyst with a B.Sc. in Statistics & Data Science from Bar-Ilan University, with sharp analytical thinking, strong attention to detail, and a keen interest in data analysis, BI, and business development. Proficient in Python, SQL, Power BI, and Excel, and seeking a Data Analysis or BI role where I can generate business insights and drive data-driven decision-making.

Experience

July 2020 – November 2024: Fraud Analyst

Risk Management Department, Isracard, Tel Aviv, Israel

- Performed complex data analysis using SQL, Excel, and internal tools on a database of millions of records to identify anomalous patterns and improve the effectiveness of credit card fraud prevention.
- Identified and investigated credit card compromise sources using company data, and implemented restrictions on key parameters to prevent future fraudulent activity.
- Conducted ongoing monitoring and control of fraud detection systems, identifying emerging fraud patterns and gaps in system coverage, and verifying that fraudulent transactions were caught in real time.

Education

2023 – 2026: B.Sc in Statistics and Data Science

Bar-Ilan University, Ramat Gan, Israel

- Built a strong mathematical and statistical foundation, including probability, linear algebra, calculus, and statistical models.
- Theoretical and practical studies in algorithms, data structures, big data technologies and data science.
- Theoretical and practical understanding of Machine Learning models (regression and classification), building them in Python and measuring and improving their performance.
- GPA: 86

June 2022 – December 2022: Certified Data Analyst Expert

John Bryce collage, Tel Aviv, Israel

- Wrote complex SQL queries (including Window Functions and CTEs) and used advanced Excel features (including VLOOKUP, XLOOKUP, Macros, and PivotTables) for data analysis and pattern identification.
- Developed Python scripts for data cleaning, manipulation, analysis, and visualization using Pandas, NumPy, Seaborn, and Matplotlib.
- Designed and built interactive reports and dashboards in Power BI for visual presentation of data.

Skills

Technical Skills

- SQL (MSSQL, Teradata)
- Python for Data Analysis (Pandas, Seaborn, Matplotlib)
- Python for ML (NumPy, Scikit-Learn, PyTorch)
- Excel (PivotTable, PowerPivot)
- Power BI
- A/B Testing
- AI Agent building

Soft Skills

- Analytical mindset
- Detail-orientation
- Communication skills
- Curiosity
- Problem-solving skills
- Fast learner
- Proactivity
- Hebrew (Native)
- English (Fluent)
